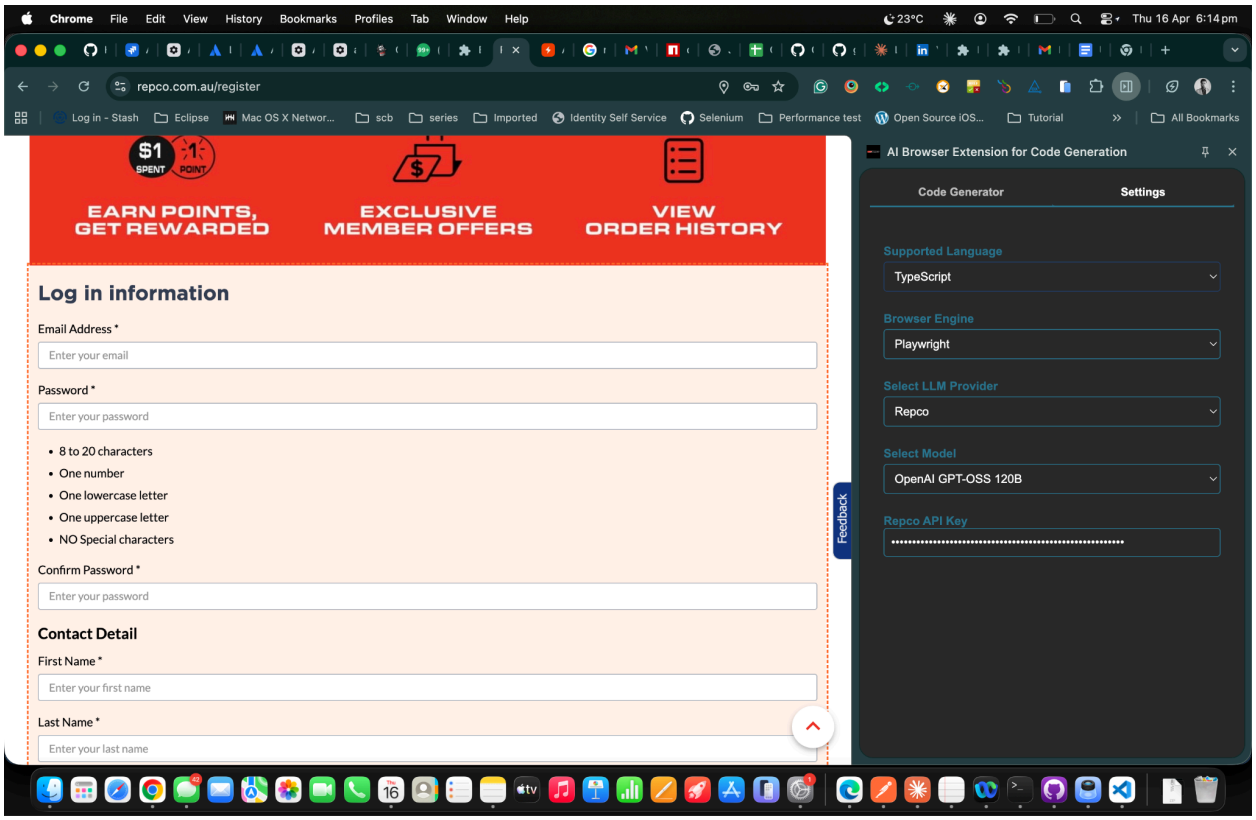
Week3- Home Assignment1

Implement Playwright/Typescript with Vibe coding



Generated code:

```
import { Page, Locator } from '@playwright/test';

export class RegisterPage {
  constructor(private readonly page: Page) {}

  // Locators
  private get titleSelect(): Locator {
    return this.page.locator('#register\\.title');
  }
  private get emailInput(): Locator {
    return this.page.locator('#register\\.email');
  }
  private get passwordInput(): Locator {
    return this.page.locator('#password');
  }
  private get confirmPasswordInput(): Locator {
```

```
  return this.page.locator('#guestcheckPwd');
}
private get firstNameInput(): Locator {
  return this.page.locator('#register\\.firstName');
}
private get lastNameInput(): Locator {
  return this.page.locator('#register\\.lastName');
}
private get mobileNumberInput(): Locator {
  return this.page.locator('#register\\.mobileNumber');
}
private get preferredStoreInput(): Locator {
  return this.page.locator('#register\\.preferredStore');
}
private get storeSearchButton(): Locator {
  return this.page.locator('.profile-edit-search-btn');
}
private get useCurrentLocationButton(): Locator {
  return this.page.locator('.js-find-near-me');
}
private get termsCheckbox(): Locator {
  return this.page.locator('#registerChkTermsConditions');
}
private get marketingCheckbox(): Locator {
  return this.page.locator('#registerChkMarketingTermsConditions');
}
private get signUpButton(): Locator {
  return this.page.locator('button.btn-register-dxb');
}

// Actions
async selectTitle(value: string): Promise<void> {
  await this.titleSelect.selectOption({ value });
}

async fillEmail(email: string): Promise<void> {
  await this.emailInput.fill(email);
}

async fillPassword(password: string): Promise<void> {
  await this.passwordInput.fill(password);
}

async fillConfirmPassword(password: string): Promise<void> {
```

```
    await this.confirmPasswordInput.fill(password);
  }

  async fillFirstName(firstName: string): Promise<void> {
    await this.firstNameInput.fill(firstName);
  }

  async fillLastName(lastName: string): Promise<void> {
    await this.lastNameInput.fill(lastName);
  }

  async fillMobileNumber(mobile: string): Promise<void> {
    await this.mobileNumberInput.fill(mobile);
  }

  async fillPreferredStore(store: string): Promise<void> {
    await this.preferredStoreInput.fill(store);
  }

  async clickStoreSearch(): Promise<void> {
    await this.storeSearchButton.click();
  }

  async clickUseCurrentLocation(): Promise<void> {
    await this.useCurrentLocationButton.click();
  }

  async acceptTerms(): Promise<void> {
    if (!(await this.termsCheckbox.isChecked())) {
      await this.termsCheckbox.check();
    }
  }

  async acceptMarketing(): Promise<void> {
    if (!(await this.marketingCheckbox.isChecked())) {
      await this.marketingCheckbox.check();
    }
  }

  async clickSignUp(): Promise<void> {
    await this.signUpButton.waitFor({ state: 'enabled' });
    await this.signUpButton.click();
  }
}
```
